**Applied Mathematics** J. David Logan

Praise for the *Third Edition*

“Future mathematicians, scientists, and engineers should find the book to be an excellent introductory text for coursework or self-study as well as worth its shelf space for reference.”

—MAA Reviews

*Applied Mathematics, Fourth Edition* is a thoroughly updated and revised edition on the applications of modeling and analyzing natural, social, and technological processes. The book covers a wide range of key topics in mathematical methods and modeling and highlights the connections between mathematics and the applied and natural sciences.

The *Fourth Edition* covers both standard and modern topics, including scaling and dimensional analysis; regular and singular perturbation; calculus of variations; Green’s functions and integral equations; nonlinear wave propagation; and stability and bifurcation. The book provides extended coverage of mathematical biology, including biochemical kinetics, epidemiology, viral dynamics, and parasitic disease. In addition, the new edition features:

- Expanded coverage on orthogonality, boundary value problems, and distributions, all of which are motivated by solvability and eigenvalue problems in elementary linear algebra
- Additional MATLAB® applications for computer algebra system calculations
- Over 300 exercises and 100 illustrations that demonstrate important concepts
- New examples of dimensional analysis and scaling along with new tables of dimensions and units for easy reference
- Review material, theory, and examples of ordinary differential equations
- New material on applications to quantum mechanics, chemical kinetics, and modeling diseases and viruses

Written at an accessible level for readers in a wide range of scientific fields, *Applied Mathematics, Fourth Edition* is an ideal text for introducing modern and advanced techniques of applied mathematics to upper-undergraduate and graduate-level students in mathematics, science, and engineering. The book is also a valuable reference for engineers and scientists in government and industry.

### **From reader reviews:**

#### **David Long:**

Throughout other case, little individuals like to read book Applied Mathematics. You can choose the best book if you appreciate reading a book. As long as we know about how is important the book Applied Mathematics. You can add knowledge and of course you can around the world by way of a book. Absolutely right, mainly because from book you can realize everything! From your country until finally foreign or abroad you will find yourself known. About simple thing until wonderful thing you could know that. In this era, we can easily open a book or perhaps searching by internet system. It is called e-book. You should use it when you feel uninterested to go to the library. Let's study.

#### **Nancy Smith:**

Do you have something that you want such as book? The publication lovers usually prefer to choose book like comic, limited story and the biggest the first is novel. Now, why not hoping Applied Mathematics that give your enjoyment preference will be satisfied simply by reading this book. Reading habit all over the world can be said as the opportunity for people to know world considerably better then how they react in the direction of the world. It can't be stated constantly that reading practice only for the geeky person but for all of you who wants to end up being success person. So , for every you who want to start reading as your good habit, you are able to pick Applied Mathematics become your own starter.

#### **Joan Cross:**

Beside this kind of Applied Mathematics in your phone, it can give you a way to get closer to the new knowledge or info. The information and the knowledge you are going to got here is fresh from oven so don't be worry if you feel like an outdated people live in narrow town. It is good thing to have Applied Mathematics because this book offers to your account readable information. Do you occasionally have book but you rarely get what it's all about. Oh come on, that wil happen if you have this in the hand. The Enjoyable arrangement here cannot be questionable, including treasuring beautiful island. Use you still want to miss that? Find this book and also read it from at this point!

#### **Laurie Dunn:**

What is your hobby? Have you heard in which question when you got pupils? We believe that that issue was given by teacher on their students. Many kinds of hobby, Every person has different hobby. And you also know that little person just like reading or as examining become their hobby. You have to know that reading is very important as well as book as to be the point. Book is important thing to include you knowledge, except your teacher or lecturer. You see good news or update in relation to something by book. Amount types of books that can you take to be your object. One of them are these claims Applied Mathematics.
