Postcolonial Perspectives on Global Citizenship Education (Routledge Research in Education)

This volume bridges the gap between contemporary theoretical debates and educational policies and practices. It applies postcolonial theory as a framework of analysis that attempts to engage with and go beyond essentialism, ethno- and euro-centrism through a critical examination of contemporary case studies and conceptual issues. From a transdisciplinary and post-colonial perspective, this book offers critiques of notions of development, progress, humanism, culture, representation, identity, and education. It also examines the implications of these critiques in terms of pedagogical approaches, social relations and possible future interventions.
