This book is about Genius—the actual, real thing. It explains what Genius is, how Geniuses can know what others cannot know, where their unique ideas come from and how to fully develop Genius in yourself. It explains how and why Genius speaks only its own language, that of the non-conscious mind, which is entirely non-linear—the only non-linearity that human brains can know. Genius does not speak the fragmented, sequential, linear languages of waking consciousness that occupy most of our time, like the natural languages, composed of words; mathematics, composed of numbers; or computer code, composed of both. Believing that waking consciousness can, of itself, develop Genius at all is entirely an illusion. It cannot, ever. This is why waking consciousness cannot directly be the source of solutions or innovations. There is, however, an experiential field of possibilities in which waking consciousness and the non-conscious mind can and must interact deliberately to develop ideas, solutions, innovations and ultimately, Genius in an individual. That playing field, as regards accomplishing a project, outcome or goal of any kind is our example and topic in specifically addressing project management. It can be applied anywhere. Genius is our birthright. It is entirely accessible because it represents the infinite diversity this universe was designed for, even in the midst of a historical “Information Age” of duplication, commoditization and fabricated normalcy; of oceans of fragmented data lined up in linear sequences in-formation. Ultimately, this book is about becoming the person you intended yourself to be. The Genius Walt Whitman, was calling us to it when he wrote, “Failing to fetch me at first, keep encouraged. Missing me one place, search another. I stop somewhere waiting for you.” And so here we are, waiting for you.
