The history of Byzantine civilization, in which social elements of the West and the East are so curiously blended and fused into a unique culture, will not be written for many years to come. It cannot be written until each successive epoch has been exhaustively studied and its distinguishing characteristics clearly ascertained. The fallacious assumption, once accepted as a truism, that the Byzantine spirit knew no change or shadow of turning, that the social atmosphere of the Eastern Home was always immutably the same, has indeed been discredited ;but even in recent sketches of this civilization by competent hands we can see unconscious survivals of that belief. The curve.of the whole development has still to be accurately traced, and this can only be done by defining each section by means of the evidence which applies to that section alone. No other method will enable us to discriminate the series of gradual changes which transformed the Byzantium of Justinian into that so different in a thousand ways of the last Constantine. This consideration has guided me in writing the present volume, which continues, but on a larger scale, my History of the Later Boman Empire from A rcadia to Irene, published more than twenty years ago, and covers a period of two generations, which may be called for the sake of convenience the Amorian epoch.
