Robert M. Hopper

The genre of science fiction didn't just spontaneously generate. It was brought to life through Frankenstein's monster, stood on the shoulders of Gulliver's giants, and morphed into being through the imagination and creative skills of Jules Verne, H. G. Wells and dozens of other authors, as well as their readers whose own lives and imaginations were sparked by their works. Here is a collection of 25 early classics written over the course of three centuries, plus a new work of 2010 featuring Robert M. Hopper's "The Book of Adam: Autobiography of the First Human Clone." The result is the equivalent of more than 4,500 printed pages tracing back many of science fiction's biggest and most influential creations, all with an Active Table of Contents and each book featuring annotated bibliographies of related books and films.

"Frankenstein" by Mary Shelley  
"The Island of Dr. Moreau" by H. G. Wells  
"The Strange Case of Dr. Jekyll and Mr. Hyde" by Robert Louis Stevenson
