Issues and Applications of Case-Based Reasoning to Design

Issues and Applications of Case-Based Reasoning to Design

Design is believed to be one of the most interesting and challenging problem-solving activities ever facing artificial intelligence (AI) researchers. Knowledge-based systems using rule-based and model-based reasoning techniques have been applied to build design automation and/or design decision support systems. Although such systems have met with some success, difficulties have been encountered in terms of formalizing such generalized design experiences as rules, logic, and domain models. Recently, researchers have been exploring the idea of using case-based reasoning (CBR) techniques to complement or replace other approaches to design support.

CBR can be considered as an alternative to paradigms such as rule-based and model-based reasoning. Rule-based expert systems capture knowledge in the form of if-then rules which are usually identified by a domain expert. Model-based reasoning aims at formulating knowledge in the form of principles to cover the various aspects of a problem domain. These principles, which are more general than if-then rules, comprise a model which an expert system may use to solve problems. Model-based reasoning (MBR) is sometimes called reasoning from first principles. Instead of generalizing knowledge into rules or models, CBR is an experience-based method. Thus, specific cases, corresponding to prior problem-solving experiences, comprise the main knowledge sources in a CBR system.

This volume includes a collection of chapters that describe specific projects in which case-based reasoning is the focus for the representation and reasoning in a particular design domain. The chapters provide a broad spectrum of applications and issues in applying and extending the concept of CBR to design. Each chapter provides its own introduction to CBR concepts and principles.

From reader reviews:

Jessie Davis:

This book untitled Issues and Applications of Case-Based Reasoning to Design to be one of several books in which best seller in this year, this is because when you read this reserve you can get a lot of benefit onto it. You will easily to buy that book in the book retailer or you can order it through online. The publisher on this book sells the e-book too. It makes you more readily to read this book, since you can read this book in your Smartphone. So there is no reason to you to past this book from your list.

Bobbie Freeman:

People live in this new day time of lifestyle always aim to and must have the spare time or they will get great deal of stress from both day to day life and work. So , when we ask do people have spare time, we will say absolutely sure. People is human not a robot. Then we request again, what kind of activity do you have when the spare time coming to anyone of course your answer may unlimited right. Then do you ever try this one, reading ebooks. It can be your alternative within spending your spare time, often the book you have read is usually Issues and Applications of Case-Based Reasoning to Design.

Robin Lawrence:

This Issues and Applications of Case-Based Reasoning to Design is great reserve for you because the content which can be full of information for you who have always deal with world and still have to make decision every minute. This book reveal it details accurately using great organize word or we can claim no rambling sentences inside it. So if you are read the idea hurriedly you can have whole info in it. Doesn't mean it only gives you straight forward sentences but challenging core information with attractive delivering sentences. Having Issues and Applications of Case-Based Reasoning to Design in your hand like obtaining the world in your arm, details in it is not ridiculous 1. We can say that no reserve that offer you world with ten or fifteen minute right but this e-book already do that. So , this can be good reading book. Hey there Mr. and Mrs. hectic do you still doubt in which?

Ricardo Hempel:

Reading a reserve make you to get more knowledge from the jawhorse. You can take knowledge and information originating from a book. Book is prepared or printed or outlined from each source that filled update of news. With this modern era like at this point, many ways to get information are available for anyone. From media social such as newspaper, magazines, science reserve, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to spread out your book? Or just searching for the Issues and Applications of Case-Based Reasoning to Design when you desired it?
