## **Working Business Plans A Complete Easy-to-Use Guide to Business Plan Building Methods By Sean Maduna** Sean Darrelle Maduna

There is no better business than the traditional business. Many of the real business developments that exist today have been derived from forms that have existed for over the 3 000 years. They have been secrets to a few throughout the world, UNTIL NOW. You too can be in the same business as any business you buy from, using smaller machines that have a high out-put capacity and are very affordable. You can also learn how those who are most successful manage their businesses.

You too can also be rich.

Get the basics right. Learn the true secret of a real business. Learn how to manage a real business. Learn how to write a business plan that you can understand, defend and implement, and, pass it on to your children. Learn about funding and product distribution. Manage your business within tried and tested parameters and pave your way to success. Your business should never be some trick devised yesterday. Respectable business is one in which you can feel comfortable undertaking it and make real money.

Be the boss!

This book does not promote MLM, get-rich-quick-schemes, lotions, potions, pills, or any dubious idea; but will take you step-by-step and have you start a real business, business in the very items that you buy from the shop. Over 70 small but high output machines are discussed, and over 100 corporate operations and processes. The small machines and devices that are used in a home business take up very little space and are very affordable. They produce out-put between 7 000 and 43 000 units a day and can fit in a normal garage or kitchen. They are available for sale from various industrial manufactures throughout the world.

Anyone can buy the machines.

All you need is capital. YOU DO NOT HAVE CAPITAL? DO NOT WORRY! YOU NEED A BUSINESS PLAN THAT REALLY WORKS. You need a business plan you can be confident of. Learn how to create your own business plan from the e-book (Working Business Plans). Learn the steps confidently. Know what your business plan means and entails. This is your business. No-one should know about its operations more than you do. That is the basis of success.

You need a business plan.

What is disenchanting is having a business plan that looks good only to you. When you get to financiers, it is a pipe-dream. Filling the gaps in creating a business plan to get a miraculous or supernatural result is a short cut, but that does not prepare you for your business. The reality is that as soon as funding gets to your hand, you will do as many have done: do business the best way you know how. And that is never according to the plan.

But from now on, you will understand the precepts of any business plan and be able to implement them. That is the most important thing for your business. Never allow yourself to go into business without critical tools to handle your business. You will be a laughing stock in your community if you fail. What prepares you is the correct information to run a business with confidence. This book details every critical path you need to be aware of when in business.

The book does not deal only with good governance, or good business practices. It also deals with the fundamentals of being in business. The being of the person who owns and runs the business. The approach to business. And not forgetting the tools and machines you need to run a complete and successful business. And you too can get this information. You too can learn the secrets of being in business and succeed.

This is not chance taking.

You get to make the same quality goods that are sold in shops or supermarkets, brand them, and make money like those who make such products. If you manage the business like they do, you will succeed like they do. No chance was taken in writing this e-book. Everything and every machine is real. And you can have any of these machines. Yes you! The secret is out.
